

Business Plan - YallaRent

1. Executive Summary

1.1 Description

YallaRent is a student equipment rental and sharing platform for Algerian campuses. It combines: - Company-owned inventory rental, - Peer-to-peer student listings, - Campus-adjacent pickup/return hubs, - Optional delivery, protection, and maintenance services.

The model addresses temporary-use demand in a large university population (1,530,230 enrolled students in 2024/2025) [S09](#).

1.2 Business Overview and Objectives

Business objective (5-year): build a pilot-proven, campus-scalable rental infrastructure with no commission on P2P transactions [A28](#).

Primary objectives: 1. Pilot and validate unit economics in AY 2026/2027. 2. Reach operational break-even from Year 2 (base case) [A27](#). 3. Expand from 1 campus to 18 campuses by Year 5 [A06](#). 4. Build mixed revenue resilience across 7 streams [A31](#) to [A37](#).

1.3 Product and Value Proposition

For students: temporary access to essential equipment without heavy upfront purchase.

For student providers: monetization of idle assets with verification and trust tooling.

For universities: partner-ready service layer that improves student living support.

Digital channel feasibility is strong with 36.2 million internet users (76.9%) and 54.8 million mobile connections (116%) in early 2025 [S16](#), [S15](#).

1.4 Market and Customers

- TAM baseline: 1,530,230 enrolled students [S09](#).
- Targeted initial SOM (active renters): 1,200 in AY 2026/2027 [A07](#).
- Year-5 active renters target: 47,500 [A07](#).

1.5 Strategy and Development

- **Phase 1 (AY26/27):** 1-campus pilot with controlled SKU scope.
- **Phase 2 (AY27/28 to AY28/29):** 3 to 7 campuses, stronger partner contracts.
- **Phase 3 (AY29/30 to AY30/31):** 12 to 18 campuses, full multi-stream model.

1.6 Financials and Resources (Base Case)

Year	Revenue (DZD)	Operating Cost (DZD)	Operating Result (DZD)
------	---------------	----------------------	------------------------

Year	Revenue (DZD)	Operating Cost (DZD)	Operating Result (DZD)
AY26/27	21,593,600	25,800,000	-4,206,400
AY27/28	60,504,000	48,300,000	12,204,000
AY28/29	132,507,200	83,000,000	49,507,200
AY29/30	241,950,000	133,000,000	108,950,000
AY30/31	388,190,000	201,300,000	186,890,000

(Model assumptions: [A06](#) to [A37](#))

1.7 Risks and Mitigation (Summary)

- Buyer price sensitivity under youth unemployment and inflation [S06](#), [S07](#).
- Substitute pressure from informal/classified channels [S26](#), [S27](#).
- Compliance obligations under Law 18-07 [S22](#), [S23](#).

2. Company Overview & Management

2.1 Company Description

YallaRent operates as a campus-focused rental operations platform with a hybrid physical-digital model.

2.2 Legal and Regulatory Position

- Startup policy path includes a 4-year renewable label framework [S24](#), [S25](#).
- Personal-data processing must align with Law 18-07 obligations, including consent logic [S22](#), [S23](#).

2.3 Management Structure (Planned)

- CEO: partnerships, growth, governance.
- COO: hubs, logistics, operations.
- CTO: platform, security, data governance.
- Trust & Safety Lead: verification, disputes, incident response.
- Finance Lead: budgeting, controls, scenario management.

2.4 HR Ramp (Base Case)

Year	Core Team FTE
AY26/27	11
AY27/28	18
AY28/29	28
AY29/30	40

Year	Core Team FTE
AY30/31	55

(Internal HR plan linked to cost growth assumptions [A25](#), [A26](#).)

3. Products / Services

3.1 Product Overview

1. Company-owned item rentals.
2. P2P listings (free up to 3 items, paid plans above threshold) [A14](#), [A28](#).
3. Delivery and pickup options [A10](#), [A11](#).
4. Damage protection add-on [A12](#), [A13](#).
5. Maintenance and end-cycle resale [A18](#) to [A21](#).

3.2 Technical Characteristics and Quality

- Mobile-first UX required by local connectivity context [S15](#), [S16](#).
- Performance target informed by local median speeds (23.42 Mbps mobile; 15.05 Mbps fixed) [S18](#), [S19](#).
- Role-based admin controls and auditable event logs for trust and compliance.

3.3 Product Strengths and Competitive Advantages

- Campus-specific logistics workflow versus generic classified platforms [S26](#), [S27](#).
- Mixed revenue engine without P2P commission dependency [A28](#).
- Built-in refurbishment/resale loop for inventory lifecycle control [A20](#), [A21](#).

3.4 Client Purchase Factors

- Total cost transparency.
- Trust in item condition and identity checks.
- Speed and convenience of handover.
- Availability at semester-critical dates.

3.5 Product Portfolio and Revenue Contribution (Base Case)

Stream	AY26/27 Share	AY30/31 Share
Company-owned rentals	60.0%	51.0%
Delivery fees	3.5%	4.1%
Damage protection	3.6%	4.5%
Subscription plans	8.3%	13.9%
University partnerships	13.9%	17.3%

Stream	AY26/27 Share	AY30/31 Share
Maintenance	2.5%	2.5%
Resale	8.1%	6.7%

3.6 Product Development Roadmap

- Year 1: booking core, verification, hub workflow, basic provider dashboard.
- Year 2-3: automation for disputes, SLA dashboarding, improved provider controls.
- Year 4-5: cross-campus inventory optimization and advanced risk scoring.

3.7 Market Life Cycle and Seasonality

- Demand peaks around semester starts and exam windows.
- End-of-semester return cycles feed maintenance and resale channels.

3.8 Sales Projection Drivers

- Active renters growth [A07](#).
- Orders and average fee growth [A08](#), [A09](#).
- Attach-rate progression [A10](#), [A12](#).

3.9 After-Sales Service and Support

- Return inspections and damage workflows.
- Maintenance interventions and replacement path.
- Escalation path for disputes.

4. Market & Clients

4.1 Market Sizing

- **TAM:** 1,530,230 enrolled students [S09](#).
- **SAM (internal launch focus):** 382,558 students (25% of TAM) [A02](#).
- **SOM:** starts at 1,200 active renters, scales to 47,500 by Year 5 [A07](#).

4.2 Segment Prioritization

1. Students in high-mobility housing patterns.
2. Students with temporary semester needs.
3. Student providers with idle assets.

4.3 Demand Conditions

- Affordability pressure: youth unemployment 29.444% [S06](#).
- Stable digital readiness: 76.9% internet penetration [S16](#).

4.4 Geographic Rollout Logic

- Start dense (one campus cluster), then expand by operating playbook replication.
 - Higher education network scale (117 institutions) supports long runway [S12](#).
-

5. Competition

5.1 Local Alternatives

- Ouedkniss: broad classified market [S26](#).
- OpenSooq: furniture listing channel [S27](#).
- Dirleco: local rental behavior proof in non-student equipment categories [S28](#).

5.2 International Benchmarks

- CORT student package benchmark starts at \$139 and references 12-month lease framing [S29](#), [S30](#).

5.3 Positioning

YallaRent differentiates on trust + campus logistics + mixed physical/digital service layer, not listing volume alone.

5.4 Competitive Response Plan

- Maintain no-commission P2P positioning.
 - Expand defensibility through operational SLAs and partner density.
 - Use bundle economics and lifecycle controls to protect margins.
-

6. Marketing Plan

6.1 Product Strategy

- Focus categories: study productivity and dorm comfort essentials.
- Build repeat behavior through bundles and semester-aligned offers.

6.2 Pricing Strategy

- Budget-sensitive architecture due unemployment/inflation environment [S06](#), [S07](#).
- Planned fee anchors:
 - Company-owned average order: 1,800 DZD (Y1), rising to 2,200 DZD (Y5) [A09](#).
 - Delivery: 300 to 380 DZD [A11](#).
 - Protection: 180 to 260 DZD [A13](#).
 - Provider plan: 12,000 DZD annual [A15](#).

6.3 Communication and Promotion Strategy

- Campus ambassadors and referral loops.
- Mobile-first growth channels aligned with 25.6M social identities [S17](#).
- Trust-led messaging: verification, condition evidence, and safe returns.

6.4 Distribution Strategy

- Digital booking + physical hub fulfillment.
- Optional last-mile delivery for higher-convenience segments.

6.5 Growth KPIs

KPI	Y1 Target	Y3 Target	Y5 Target
Active renters	1,200	10,500	47,500
Repeat rental rate	30%	42%	52%
Provider paid-plan conversion	12%	18%	24%
Dispute resolution within SLA	85%	92%	95%

(Targets from internal growth model [A07](#), [A14](#).)

7. Infrastructure & Technology

7.1 Platform Infrastructure

- Student interface: browse, reserve, manage rentals.
- Provider interface: list, approve, track earnings.
- Admin interface: verification, moderation, disputes, quality controls.

7.2 Operations Infrastructure

- Hubs for pickup/return/inspection.
- Inventory tracking and condition history.
- Maintenance queue and repair workflow.

7.3 Sales and Administration

- Campus pipeline tracking.
- Partner contract lifecycle management.
- Centralized pricing and category management.

7.4 Premises and Physical Footprint

- Pilot uses light hub footprint.
 - Scale stage adds capacity by campus based on utilization and order density [A22](#).
-

8. Financial Management

8.1 Financial Objectives

- Reach annual operating break-even by AY27/28 in base case [A27](#).
- Preserve liquidity buffer during pilot and rollout phases.

8.2 Monitoring System

Monthly review packs: - Revenue by stream, - Cost by function, - Utilization and damage KPIs, - Campus-level contribution margins.

8.3 Financial Tools and Controls

- Rolling 18-month cash planning.
- Scenario analysis (conservative/base/upside) [A25](#), [A26](#).
- Approval thresholds for capex and inventory purchases.

8.4 Governance and Responsibilities

- Finance lead owns reporting and forecast discipline.
- COO co-owns operational cost controls.
- CEO owns partner revenue targets.

8.5 Capital Structure and Financing Plan

- Pilot financed through founder capital + grant/competition pipeline.
- Expansion financing triggered after validated Year-2 economics.

9. Financial & Operational Planning

9.1 Base Case Revenue by Stream (DZD)

Stream	AY26/27	AY27/28	AY28/29	AY29/30	AY30/31
Company-owned rentals	12,960,000	34,200,000	72,000,000	126,000,000	198,000,000
Delivery fees	756,000	2,304,000	5,140,800	9,720,000	16,074,000
Damage protection	777,600	2,340,000	5,306,400	10,080,000	17,316,000
Provider subscriptions	1,800,000	6,000,000	16,800,000	33,600,000	54,000,000

Stream	AY26/27	AY27/28	AY28/29	AY29/30	AY30/31
University partnerships	3,000,000	9,000,000	20,000,000	39,600,000	67,200,000
Maintenance services	540,000	1,560,000	3,360,000	5,850,000	9,600,000
End-cycle resale	1,760,000	5,100,000	9,900,000	17,100,000	26,000,000
Total Revenue	21,593,600	60,504,000	132,507,200	241,950,000	388,190,000

9.2 Base Case Operating Cost Plan (DZD)

Cost Category	AY26/27	AY27/28	AY28/29	AY29/30	AY30/31
Inventory procurement & refurbishment	7,200,000	16,000,000	31,000,000	52,000,000	81,000,000
Hub operations & storage	2,400,000	5,000,000	9,000,000	15,000,000	24,000,000
Payroll	9,600,000	14,000,000	21,000,000	31,000,000	44,000,000
Technology / cloud / payments	1,800,000	3,000,000	4,800,000	7,000,000	9,800,000
Marketing & sales	2,200,000	5,000,000	9,000,000	15,000,000	23,000,000
Maintenance operations	1,100,000	2,500,000	4,000,000	6,500,000	10,000,000
G&A / legal / compliance	1,500,000	2,800,000	4,200,000	6,500,000	9,500,000
Total	25,800,000	48,300,000	83,000,000	133,000,000	201,300,000

Cost Category	AY26/27	AY27/28	AY28/29	AY29/30	AY30/31
Operating Cost					

9.3 Operating Result (Base Case)

Year	Revenue	Cost	Operating Result
AY26/27	21,593,600	25,800,000	-4,206,400
AY27/28	60,504,000	48,300,000	12,204,000
AY28/29	132,507,200	83,000,000	49,507,200
AY29/30	241,950,000	133,000,000	108,950,000
AY30/31	388,190,000	201,300,000	186,890,000

9.4 Scenario View (Conservative / Base / Upside)

Scenario rules: revenue and cost multipliers from [A25](#) and [A26](#).

Year	Conservative Result	Base Result	Upside Result
AY26/27	-6,461,120	-4,206,400	-1,388,000
AY27/28	3,967,200	12,204,000	22,500,000
AY28/29	29,645,760	49,507,200	74,334,000
AY29/30	71,200,000	108,950,000	156,137,500
AY30/31	125,356,000	186,890,000	263,807,500

9.5 Break-Even

- Base-case annual break-even is reached in AY27/28 [A27](#).
- Cumulative break-even (covering initial Year-1 deficit) is reached during AY27/28.

9.6 Sensitivity Highlights

Driver	Low Case	Base	High Case	Impact Summary
Utilization rate	48%	58%	68%	Approx. +/- 14% impact on company-owned rental revenue A22 .
Non-recoverable damage rate	4.0%	2.8%	2.0%	Approx. +/- 3 to 5 points on operating margin A23 .

Driver	Low Case	Base	High Case	Impact Summary
Campus acquisition pace	-1 campus/year from Y2	Base	+1 campus/year from Y2	Directly shifts Y5 revenue by ~15-20% in model envelope A24 .

9.7 Financing Strategy

- Prioritize low-dilution pilot capital until Year-2 proof.
- Fund expansion hubs after repeatability metrics are stable.

9.8 Three Best-Performing Products (Expected by Revenue)

1. Company-owned rentals [A31](#)
2. University partnerships [A35](#)
3. Provider subscriptions [A34](#)

9.9 Top Three Client Buckets in Forecast

1. Student renters in core campus clusters.
2. Student providers with paid listing plans.
3. University partner accounts.

9.10 Seasonal Cash-Flow Considerations

- Upfront inventory and setup spend before semester starts.
- Mid-semester utilization peak improves cash generation.
- End-of-semester returns drive maintenance and resale cash events.

9.11 Financing New Acquisitions

- Inventory acquisition cadence tied to utilization and return-cycle analytics.
- Procurement cap tied to maintained liquidity thresholds.

10. Risk Assessment

10.1 Internal Risks (Organization, Management, Operations)

- Early-stage execution overload across logistics and support.
- Mitigation: phased campus expansion and SLA-led operating cadence.

10.2 Commercial Risks (Market, Product, Pricing)

- Strong substitute pressure from informal/classified channels [S26](#), [S27](#).

- Mitigation: trust differentiation and bundle economics.

10.3 Financial Risks

- Inflation and cost drift [S07](#).
- Mitigation: quarterly repricing controls and scenario re-forecasting.

10.4 Exogenous Risks (Legal, Political)

- Data-governance failures can create legal exposure under Law 18-07 [S22](#), [S23](#).
- Mitigation: consent and retention governance by design.

10.5 Technical and Operational Risks

- Device/network heterogeneity despite improving speed trends [S18](#), [S20](#).
- Mitigation: mobile performance budget and fallback flows.

10.6 Environmental and Ecological Risks

- High damage rates weaken resale sustainability loop.
- Mitigation: inspection protocol + maintenance routing + quality scorecards.

10.7 Risk Probability-Impact Matrix (Summary)

Risk	Probability	Impact	Priority
Low adoption vs. target	Medium	High	High
High damage/loss rate	Medium	High	High
Compliance incident	Low-Medium	High	High
Supply stockout peak	Medium	Medium	Medium
Logistics SLA misses	Medium	Medium	Medium

10.8 Risk Management Philosophy

Operate with conservative pilot controls, data-backed scaling gates, and quarterly scenario recalibration.

11. Appendices

11.1 Linked Supporting Documents

- [Porter 5+1](#)
- [Empathy Card](#)
- [PESTEL Analysis](#)
- [Business Model Canvas](#)
- [Services Overview](#)

- [Assumptions Register](#)
- [Source Register](#)
- [Glossary](#)

11.2 Source Quality Notes

- Priority given to official/public-primary sources for demographics, macroeconomics, education, and legal context.
- Industry source (DataReportal) used for digital adoption and speed metrics where official dashboards are less operationally specific.
- Company-primary pages used for competitor existence and benchmark positioning.
